

Aditya Rahman Ananda

Backend Software Engineer

Jakarta, Indonesia | +62 822 4467 4063 | adityard01.dev@gmail.com | github.com/adityarahmanananda-dev | adityarahmanananda-dev.github.io/web-portfolio | Willing to relocate & open to any location

PROFESSIONAL SUMMARY

Backend Software Engineer with 10+ years building database-driven applications, automation systems, and enterprise financial software for government and academic institutions. Proficient in Go, Java, Spring MVC, Python, PostgreSQL, and SQL; strong in REST API design, system architecture, exact-money financial modeling, Docker, and Linux.

TECHNICAL SKILLS

- **Languages:** Go, Java, Python, SQL, JavaScript
- **Backend & Frameworks:** Spring MVC, REST APIs, Flask
- **Databases:** PostgreSQL, Oracle Database, SQLite, Database Design, Query Optimization
- **DevOps & Platforms:** Docker, Linux, Git
- **Engineering Practices:** System Design, Software Architecture, Agile/Scrum, JasperReports
- **Specialized:** API Development, Web Scraping, Playwright

PROFESSIONAL EXPERIENCE

Backend Software Engineer / Systems Developer

May 2019 – Present

Pemerintah Provinsi DKI Jakarta (Jakarta Provincial Government), Jakarta

- Built backend automation and data pipelines that significantly reduced manual effort in HR and financial reporting.
- Designed and optimized PostgreSQL solutions powering real-time monitoring and decision-support dashboards.

Software Developer

Aug 2015 – Nov 2018

Pusat Ilmu Komputer, Universitas Indonesia, Jakarta

- Developed enterprise accounting backends in Java/Spring with IFRS-compliant JasperReports reporting.
- Improved application performance by 30%+ through SQL query optimization, index tuning, and database architecture.

KEY PROJECTS

Banpem-GO — Government Grant Cash Book (Go)

- Exact-money cash-book system for government grant funds, deployed at SMK Negeri 26 Jakarta.
- Architected a Go monolith: integer tax engine (ROUND_HALF_EVEN), dual ledgers, automated journal entries, and auditor-ready Excel/PDF/Word reports; containerized as a single static binary.
- Replaced manual spreadsheet bookkeeping and eliminated tax-calculation errors; standardized official government reporting.
- *Skills:* Go, PostgreSQL, Docker, REST APIs, System Design

IFRS Accounting System (Java/Spring)

- Enterprise accounting system with IFRS-compliant reporting serving multiple organizational clients.
- Designed backend modules in Java/Spring; built general ledger, AP/AR, and financial statements with JasperReports; optimized Oracle schema and queries.
- Improved application performance by 30%+ via SQL query optimization, index tuning, and database architecture improvements.
- *Skills:* Java, Spring MVC, Oracle Database, JasperReports, Query Optimization

DevBashboard — Local Developer Environment Dashboard

- One local UI to auto-detect, start, and monitor every development project.
- Built Node/Express/WebSocket dashboard with stack and database detection, collision-free ports, process-group lifecycle control, and Docker Compose orchestration with live logs.
- Runs a 13+ project portfolio from one screen, eliminating port clashes and manual per-stack startup scripts.
- *Skills:* JavaScript, Docker, Docker Compose, REST APIs, System Design

Attendify — ASN Attendance Scraper & Rekap

- Automated scraping and reconciliation of ASN attendance from BKD DKI Jakarta's e-attendance system.
- Drove a real Chrome session to capture login; scraped and parsed the portal into SQLite; generated per-employee recaps and Excel/PDF exports.
- Replaced manual Excel consolidation and made attendance recap generation repeatable and auditable.
- *Skills:* Python, Playwright, Web Scraping, Flask, SQLite

EDUCATION

Master of Information Technology

2018 – 2022

Universitas Indonesia, Jakarta — Software Engineering, Big Data

Bachelor of Computer Science

2010 – 2015

Universitas Indonesia, Depok — CS Core: Data Structures, OS, Databases, Web

CERTIFICATIONS & LANGUAGES

- **Certification:** Google Cybersecurity Specialization | **Languages:** Indonesian (Native), English (TOEIC 925), Korean
